1.0 Introduction and Context

1.1 Southwark’s Safeguarding Children Board is the statutory body with lead strategic responsibility for coordinating the activities of local agencies in terms of safeguarding children and children’s welfare, and for ensuring the effectiveness of those activities.

1.2 Southwark Safeguarding Children Board (SSCB) is committed to tackling the sexual exploitation of children and young people living in the borough and those in care placed out of the borough. The Board recognises that only a proactive, co-ordinated, multi-agency approach will be effective in achieving this.

1.3 Recent publications, including the Independent Inquiry into Child Sexual Exploitation in Rotherham 1997-2013 emphasise the need to strengthen local arrangements to protect children and young people who are either victims or at risk of CSE. This strategy will need to be subject to periodic review, suggested initially at 6 months post-adoption, to ensure it remains effective and up-to-date.

1.4 The strategy will seek to build on existing strengths in multi agency working, making good use of resources such as the Multi Agency Safeguarding Hub.

1.5 The Metropolitan Police published its Pan-London Protocol for Child Sexual Exploitation in 2014 and this Strategy envisages the full adoption of that protocol locally in Southwark.

1.6 The Department for Education’s 2011 Action Plan for Tackling Child Sexual Exploitation states that “LSCBs will want to assure themselves that local services are based on a robust assessment of need in the locality, taking account of the statement in the statutory guidance that every LSCB ‘should assume that sexual exploitation occurs within its area unless there is clear evidence to the contrary’. They will also want to assure themselves that local services are designed and delivered effectively to tackle the issue where it arises.”

1.7 Supplementary Guidance from 2009, referred to in Working Together 2013, specifies that LSCBs should ensure that:

- the needs of children and young people who have been or may be sexually exploited and their families have been considered when planning and commissioning local services;
- specific local procedures are in place covering the sexual exploitation of children and young people;
- local safeguarding training includes information about how to identify the signs of sexual exploitation and an understanding of how to gather evidence which can be used to bring prosecutions against abusers;
- where sexual exploitation is known to be prevalent locally, specialist training is available for key professionals;
• systems are in place to track and monitor cases of sexual exploitation that come to the attention of local agencies; 7 Safeguarding Children and Young People from Sexual Exploitation
• a LSCB sub-group is put in place to lead on the issue of sexual exploitation, driving work forward and ensuring effective cooperation between agencies and professionals;
• There is a dedicated lead person in each partner organisation with responsibility for implementing this guidance;
• arrangements are in place to cooperate with neighbouring areas and those areas where children who have been sexually exploited are believed to have lived or been present

1.8 The SSCB’s strategic intent is to:

• Prevent the occurrence of CSE.
• Build intelligence and develop a problem profile of CSE locally
• Provide support which is timely and effective for victims of CSE
• Disrupt the activities of perpetrators
• Prosecute perpetrators

1.9 Southwark Safeguarding Children Board’s commitment to tackle CSE is articulated in its pledge on CSE, agreed by all member agencies on Board. This pledge is enclosed as Appendix A.

1.10 The Rotherham Inquiry into CSE found that “as early as 1998, […] procedures identified the victims as children and the prosecution of perpetrators as a priority. Under the auspices of the SCB and its predecessor, the Area Child Protection Committee, there was a good range of strategies, policies and procedures applicable to child protection and specifically to CSE. These were of generally good quality and had been developed on an inter-agency basis. The weakness was that the Safeguarding Board rarely seemed to check whether they were being implemented and whether they were working. The challenge function of the Safeguarding Board did not appear to have been fully exercised”. SSCB is aware of the need to fully implement, evaluate and review this strategy.

2.0 Definition

2.1 Child sexual exploitation is a form of child abuse. Southwark’s Safeguarding Children Board is using the definition of CSE set out by the Department for Education in 2012:
Sexual exploitation of children and young people under 18 involves exploitative situations, contexts and relationships where young people (or a third person or persons) receive ‘something’ (e.g. food, accommodation, drugs, alcohol, cigarettes, affection, gifts, money) as a result of them performing, and/or another or others performing on them, sexual activities. Child sexual exploitation can occur through the use of technology without the child’s immediate recognition; for example being persuaded to post sexual images on the internet/mobile phones without immediate payment or gain.

In all cases, those exploiting the child/young person have power over them by virtue of their age, gender, intellect, physical strength and/or economic or other resources. Violence, coercion and intimidation are common, involvement in exploitative relationships being characterised in the main by the child or young person’s limited availability of choice resulting from their social/economic and/or emotional vulnerability.

2.2 There are six key points to emphasise in this definition which will affect the understanding of CSE:

- CSE as a form of abuse can apply to all children and young people, not just those under the age of consent – children aged 16 or 17 can still be sexually exploited, and children from any ethnic or religious background can be victims;
- CSE can occur in a wide range of relationships, contexts and exploitative situations, including bullying;
- There is typically a power imbalance between perpetrator and victim;
- The victim commonly has limited choice – resulting from their various vulnerabilities – though may not recognise the limitations of their ability to choose;
- Increasingly, the use of technology (particularly mobile phones and social networking) is involved in incidences of CSE.
- A victim cannot consent to their abuse: children are not responsible for being sexually exploited.

2.3 There are many characteristic warning signs that a child may be being sexually exploited. These include, but are not limited to:

- Going missing for periods of time or regularly coming home late
- Regularly missing school or education or not taking part in education
- Appearing with unexplained gifts or new possessions
- Associating with other young people involved in exploitation
- Having older ‘boyfriends’ or ‘girlfriends’
- Suffering from sexually transmitted infections
- Mood swings or changes in emotional wellbeing
- Drug and alcohol misuse; and
- Displaying inappropriate sexualised behaviour.

2.4 Research carried out by Barnardo’s in 2011 identified three broad categories of CSE. These were:
<table>
<thead>
<tr>
<th></th>
<th>Inappropriate relationships</th>
<th>Usually involves one perpetrator who has inappropriate power or control (physical, emotional, financial, etc) over a young person – perhaps indicated by a significant age gap. The young person may believe they are in a loving relationship.</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>‘Boyfriend’ model and peer exploitation</td>
<td>Perpetrator befriends and grooms a young person into a ‘relationship’ and coerces them to have sex with friends or associates. This can be associated with gang activity.</td>
</tr>
<tr>
<td>3</td>
<td>Organised / networked CSE and trafficking</td>
<td>Young people are passed through networks, possibly over geographical distances between places where they will be coerced into sexual activity with multiple perpetrators. Young people may be used as agents to recruit others into the network. Some of this type of CSE can be serious organised crime and involve the buying and selling of young people.</td>
</tr>
</tbody>
</table>

3.0 Current intelligence and problem profile: shaping our priorities

3.1 It is generally acknowledged there are low levels of reporting of CSE nationally and so it remains largely invisible. No datasets available locally illustrate the likely true extent of CSE in the borough.

3.2 Our starting point must be, therefore, to assume that CSE is happening in Southwark in different ways, at different locations and across communities. One outcome of this strategy is to improve the collection, analysis and application of data pertaining to CSE.

3.3 Over recent years, Southwark’s Multi Agency Sexual Exploitation Panel has considered individual victims of CSE on a case-by-case basis, shared information and contributed to the plan for safety for these young people.

3.4 A review of open cases took place in April 2014 to identify the characteristics of young people who may be at risk of CSE. Largely consistent with national profiling of CSE victims, this found that:

- A large proportion of those at risk were children in care, spread evenly between placements in borough, within London and out of London
- Many were children frequently going missing from care
- Around half of the children at risk were still living at home
- The vast majority were in education, though some had poor or persistent absence
- A high proportion of those at risk had a Special Educational Need
3.5 A more comprehensive problem profile is needed to understand the manifestation and characteristics of CSE in Southwark – such as types of victims, perpetrators, locations, grooming methods and the potential implication of gangs and drugs. Building capacity to understand and analyse CSE is a key element of this strategy. As a key information sharing resource, the MASH will play a crucial role in the collation of CSE data and as such all CSE concerns will be brought to the attention of MASH.

3.6 Developing a more robust approach to preventing CSE among those children in local authority care is a high priority, and will have implications for risk assessment, placement matching and brokerage.

3.7 It is known that trafficked children can be at particularly acute risk of CSE, as traffickers forcefully move children into or around the UK specifically for the purposes of prostitution and sexual exploitation by gangs, groups or individuals. Cases involving trafficking require close co-operation with the UK Human Trafficking Centre and specialist immigration officials where relevant.

3.8 A strategic link must be established between children who go missing from home, school or care and our action to prevent CSE and safeguard children. Operationally, data about these children must be routinely triangulated to consider CSE risks.

3.9 Through direct engagement and ethnographic research with young people in preparation for this strategy, we know that CSE is not a widely understood concept among adolescents. Young people may be familiar with relationships where one person ‘takes advantage’ or ‘manipulates’ another, but young people are unlikely to understand the long-term harm that can result from sexual exploitation, nor that such exploitation constitutes abuse. We know, too, that the dangers of grooming are likely to be ill-understood and that many young victims will perceive the relationships they are in to be harmless.

3.10 In Southwark, links between CSE and gangs are thought to be highly probable. The borough has a strong strategy in place to tackle gang culture, and CSE disruption strategies must be closely aligned with intelligence around gangs and drugs. The role of Community Safety in this is key.

4.0 Principles

4.1 The following principles will inform everything we do to tackle CSE in Southwark. They are drawn from the Children’s Commissioner’s ‘See me, Hear me’ framework, as per Appendix D.
• **The interests of children are our top priority**: Our approach to prevention and casework will involve listening to children, acting on what children and victims tell us, and keeping children safe from exploitation. We recognise that all children have different levels of needs therefore it is important to tailor support to their needs which leads to an appropriate multi-agency response.

• **Enduring relationships and support are essential**: To be safe, victims need stable, supportive relationships with their parents or carers and with professionals. Victims will be treated and regarded as victims. Victims cannot be blamed for being abused.

• **We need a thorough and dynamic understanding of CSE in Southwark**: We will build a comprehensive profile of the local problem to inform action plans, commissioning, training and disruption.

• **We must act together as partners**: We will implement a single, coordinated approach across the multi-agency partnership, delivered across all agencies and at all levels of intervention. We will avoid silos by embedding CSE in other policies, processes and strategies across the partnership. We will share information where it is in the best interests of the child.

• **We must enable our staff to do the best possible job**: Our staff will require training, supervision and support in order to keep children safe from CSE and support victims.
5.0 Strategic Intent & Priorities

5.1 Our strategic priorities derive from our principles and our problem-profile to date and are informed by our learning from national publications and reviews. These have included the Office of the Children’s Commissioner’s Inquiry into CSE in Gangs and Groups (If only Someone had listened), the London Councils / London Safeguarding Children Board report Tackling CSE: A study of Current Practice in London, and the Met Police Pan-London Operating Protocol for CSE. Our safeguarding board has also consulted with boroughs such as Rochdale and Bradford, who have well developed approaches to tackling CSE.

5.2 In the light of recently published materials, specifically the Inquiry into CSE in Rotherham, this strategy will be renewed in Spring 2015. We will undertake a review of this strategy with due consideration to the lessons emerging from this Inquiry.

5.3 Our five strategic priorities are to:

a. **Prevent** CSE from occurring in Southwark and to children from Southwark.
   - Multi-agency pledge
   - Training for staff
   - Awareness raising in schools, including through PSHE
   - Community awareness: campaign and potential online social marketing
   - Engagement with community groups and faith groups
   - Engagement with licensees in taxi firms and hotels
   - Leveraging the licensing process to ensure licence applications consider safeguarding risks including CSE

b. **Build intelligence** and quickly identify the victims, perpetrators, models and locations involved.
   - Dedicated CSE coordinator
   - New CSE protocol, ensuring routine referral via MASH
   - Robust monitoring of children missing from home, school and care
   - Establishing Police-led MASE meeting
   - Commission problem profile
   - Update Thresholds document
   - Understand the young person’s experience of our services

c. **Provide timely, effective support** to all victims of CSE
   - Strengthen approach to working with trafficked children
   - Commission dedicated CSE casework
   - Implement risk assessment tool for CSE cases
   - Embed protocol which ensures multi-agency collaboration on complex cases

d. **Disrupt** the activities of those that are sexually exploiting children.
   - MASE meeting to use Problem Profile to specifically plan disruptions
• Regular reporting on number of disruptions
• Continue work with licensing and other agencies

e. Prosecute perpetrators to the full extent of the law.
• Implementation of Pan London Protocol
• Use of Ancillary Orders
• Support for victims in the criminal justice process
• Toolkit of investigative strategies

5.4 As the local problem profile is developed and so agencies’ understanding of CSE in Southwark is improved, SSCB will revisit these priorities and ensure they reflect the nature and level needs in the borough.

5.5 These priorities provide the framework for our action plan, which sets out how we will go about delivering against these priorities. Our action plan is included as Appendix C.

6.0 Operating model

6.1 Southwark’s Safeguarding Children Board is committed to implementing a coherent operating model for tackling CSE. This will be developed and refined as the problem profile and other immediate work in the action plan is undertaken. However, the Board has agreed in principle to implement the ‘See me, Hear me’ model as set out by the Office of the Children’s Commissioner. This is included at Appendix C. The key features to which we are committed are:
• Strategic lead from Safeguarding Children Board and CSE subgroup
• A CSE lead within each agency
• A ‘problem profile’, pulling together evidence from all agencies
• A CSE coordinator based in Southwark Council
• A CSE referral hub within MASH
• Co-ordination across other sub groups/networks ensuring that professionals and other adults in contact with children and young people are alert to risk factors and indicators of CSE
• End to end services, from prevention to rehabilitation and including a range of specialist support to target support effectively
• A strong contribution from the Voluntary and Community Sector

7.0 Evaluation

7.1 The CSE Subgroup will review this strategy in June 2015 in the light of emerging priorities or concerns.

7.2 The CSE Subgroup will monitor the effectiveness of this strategy using its CSE data dashboard. The CSE data dashboard covers all elements of the strategy:
• Prevention, e.g. number of staff trained
• Identification, e.g. number of referrals and source of referrals
• Support, e.g. number of cases at CiN, CP and LAC
• Disruption and Prosecution, e.g. number of disruptions compared to other London boroughs

7.3 An early sign of success will be an increase in the number of CSE referrals. This will demonstrate the effectiveness of awareness raising activity and the embedding of the referral protocol.

7.4 Audit (both multi- and single-agency) will also contribute to the evaluation of this strategy. An initial multi-agency audit is planned for December 2014, with a secondary evaluative audit in December 2015.

7.5 The voices of children and young people are also important for the evaluation of this strategy in terms of their perspectives on preventative and support work. The Board will develop means of listening to the voices of children and young people about the effectiveness of prevention (PHSE) and the appropriateness of support work (including work by social care).
Appendix A: Southwark Safeguarding Children Board Pledge on CSE

Southwark Safeguarding Children Board will:

- Take a proactive, co-ordinated multi-agency approach.
- Prioritise intelligence and analysis, and use it to develop our understanding of the prevalence and nature of CSE in Southwark.
- Do everything in our power to prevent CSE from happening in Southwark and to Southwark children.
- Focus on early identification and providing early help.
- Support parents, communities and professionals to identify signs of vulnerability and signs of abuse and know what they should do and where to get help.
- Establish the MASH as a single point of referral
- Develop a shared risk assessment model used by all agencies across a continuum of need (up to 25 years of age)
- Ensure professionals working at all levels of need understand CSE, have confidence in how to respond, and have access to expert support and advice.
- Develop a range of interventions across a continuum of need, taking a child- or family-centred approach to supporting victims and survivors.
- Devise a strategic approach to disrupting and prosecuting perpetrators.
- Monitor outcomes and learn from successes and failures.
Appendix B: Warning signs and vulnerabilities checklist identified during Phase 1 of the Inquiry (Children’s Commissioner)

The following are typical vulnerabilities in children **prior to abuse**:

- Living in a chaotic or dysfunctional household (including parental substance use, domestic violence, parental mental health issues, parental criminality)
- History of abuse (including familial child sexual abuse, risk of forced marriage, risk of honour-based violence, physical and emotional abuse and neglect)
- Recent bereavement or loss.
- Gang-association either through relatives, peers or intimate relationships (in cases of gang associated CSE only).
- Attending school with children and young people who are already sexually exploited.
- Learning disabilities.
- Unsure about their sexual orientation or unable to disclose sexual orientation to their families.
- Friends with young people who are sexually exploited.
- Homeless.
- Lacking friends from the same age group.
- Living in a gang neighbourhood.
- Living in residential care.
- Living in hostel, bed and breakfast accommodation or a foyer.
- Low self-esteem or self-confidence.
- Young carer.

The following signs and behaviour are generally seen in children who are **already being sexually exploited**.

- Missing from home or care.
- Physical injuries.
- Drug or alcohol misuse.
- Involvement in offending.
- Repeat sexually-transmitted infections, pregnancy and terminations.
- Absent from school.
- Change in physical appearance.
- Evidence of sexual bullying and/or vulnerability through the internet and/or social networking sites.
- Estranged from their family.
- Receipt of gifts from unknown sources.
- Recruiting others into exploitative situations.
- Poor mental health.
- Self-harm.
- Thoughts of or attempts at suicide.
Evidence highlighted in the interim report showed that any child displaying several vulnerabilities from the above lists should be considered to be at high risk of sexual exploitation. Professionals should immediately start an investigation to determine the risk, along with preventative and protective action as required. However, it is important to note that children and young people without pre-existing vulnerabilities can still be sexually exploited. Therefore, any child or young person showing risk indicators in the second list, but none of the vulnerabilities in the first, should also be considered as a potential victim, with appropriate assessment and action put in place as required. The following organisations and agencies need to take account of the above list and work together to identify children and young people showing the warning signs of, or who are vulnerable to, child sexual exploitation, and act accordingly.

- Accident and Emergency departments
- CAMHS services
- Children’s Social Care (including family support/early intervention teams, child protection/duty and assessment teams, looked-after children teams, leaving care teams)
- Drop-in clinics and community based health services
- Drugs and alcohol misuse services
- Educational institutions (including schools, pupil referral units, academies, private schools, special schools, and extra-curricular provision)
- Fire Service
- Gangs and serious youth violence projects
- GP surgeries
- GUM and family planning clinics
- Housing (including foyers, hostels, refuges, bed and breakfast, and housing associations)
- Midwifery and health visitors
- Police (including neighbourhood policing, missing, safer schools officers, gangs and youth violence, organised crime, trafficking, child abuse investigation teams, sexual offences teams)
- Residential children’s homes
- Sexual Assault Referral Centres
- Violence against women agencies (including rape crisis and refuge provision)
Appendix C: Southwark Safeguarding Children Board: CSE Multi Agency Action Plan

This action plan will be monitored by the CSE Subgroup and Southwark Safeguarding Children Board with R-A-G ratings describing progress completing the action and, where relevant, the impact of that action.

Monitoring the Action Plan is one of the ways in which Southwark Safeguarding Children Board will evaluate the effectiveness of its approach to tackling CSE.

In addition, the CSE Subgroup reviews, at each meeting, a data dashboard covering various elements of the strategy, for example:

- Prevention, e.g. number of staff trained in online and face-to-face training, number of schools with CSE integrated into PSHE curriculum
- Identification, e.g. number of referrals and source of referrals, review of the problem profile, age and gender profile of victims
- Support, e.g. number of CSE cases with a Child Protection Plan, number of CSE cases relating to Looked After Children
- Disruption and Prosecution, e.g. number of disruptions compared to other London boroughs

Audits of cases, both within Children’s Social Care and across the multi-agency partnership, will be another means used to judge the effectiveness of this strategy. Audits will illustrate the quality of interventions, the speediness of response, the effectiveness of safety planning and the effectiveness of multi-agency working. An initial multi-agency audit is planned for January 2015, with follow-up audit timings to be determined following the outcome of the first phase.

The voices of children and young people are also important for the evaluation of this strategy in terms of their perspectives on preventative and support work. The Board will develop means of listening to the voices of children and young people about the effectiveness of work to prevent CSE and support offered to victims.
### STRATEGIC PRIORITY 1: **PREVENT** CSE FROM OCCURRING IN SOUTHWARK AND TO CHILDREN FROM SOUTHWARK
